

OPENKM ACADEMY PRICES.

OpenKM offers its new E-Learning platform. Two different agendas are currently provided that respond to the stages of carrying out the platform's implementation, maintenance, and subsequent development.

Certifications are offered with tutorials, exercises, related documents, examples, and live tutored classes by video conference. In this way, students can conveniently manage their time to assume the knowledge that the certifications provide. The courses by video conference will be recorded and made available for later viewing if required.

The certificates are as follows:

Consultant: The OpenKM certified consultant will manage a complete project of implementation of the document manager:

- Principles and standards of a document management system.
- How to design a document management model.
- Answer questions about the functional and technical characteristics of OpenKM.
- Perform basic and advanced OpenKM demos autonomously.
- Provide OpenKM training at the user level.
- Develop a technical and economic proposal.
- Support the administrator and developer in setting up OpenKM.

OpenKM management: it provides the necessary knowledge for the development and expansion of our documental management software:

- Launch the application.
- Basic management capabilities.
- Installation process.
- Customizing OpenKM.
- Examples of developments in production.
- Customer success stories

Developer (coming soon): The objective is to provide the necessary knowledge to develop and evolve the application through the tools provided, including chapters as diverse as creating new interfaces to bulk export and import strategies.
